

Nadeem Shareef

Software Developer

Hey there, This is Nadeem Shareef. I am not a "React Developer", "Frontend Developer", or "Framework Developer". I am a software developer. I solve problems. I love solving problems related to the user experience of the software.

EXPERIENCE

KMZee Holding, Hyderabad — Software Developer

May 2022 - PRESENT

- Lead the frontend development of the E-Commerce Website. [Kmmzee.in](https://kmzee.in)
- Developed an operation-driven dashboard for multiple clients in the car auction industry, enabling them to control auctions on their application from the dashboard.
- Designed reusable React components with TypeScript that reduced development time and improved code quality and maintainability.
- Build a modern, infographic, user-friendly website for our company's tech vertical kmzee.tech, kmzee.online, and client websites.
- Streamline the technologies used in making the dashboards for our clients.

BLOGS

- I write articles on various aspects of web development, offering solutions to the challenges I encountered while developing.
- Consistently attract an average weekly viewership of 3,000, accumulating over 400,000 views.

PROJECTS

YOUROUNOTES

During the lockdown, I identified a communication gap between faculty and students as physical classes moved online. To address the challenge of finding notes and previous year's question papers, I built a platform for students to upload and access notes for each subject. This initiative helped bridge the gap and facilitated a smoother transition to online learning.

EDUCATION

Bachelor of Engineering (B.E), Computer Science

ISL Engineering College (Osmania University) - Hyderabad, Telangana, India

Hyderabad, India
+91 7815837564
nadeemshareef934@gmail.com

SKILLS

Frontend Technologies - React, Next, TypeScript, JavaScript, Firebase, Zod, Redux, TanStack Query, Tailwind CSS.

Tools - Git, GitHub, Git Bash, Postman, VSCode

AWARDS

Dev.to Moderator

As a Moderator on dev.to, I review and approve posts, enforce community guidelines, and foster respectful discussions. I maintain the platform's standards, address inappropriate content or behavior, and promote a safe and supportive space for developers. My role demonstrates my commitment to community building, ability to enforce guidelines effectively, and passion for cultivating a vibrant developer community.
